Brugherio, 25th May 2022

Object: Statement on REGULATION (EC) No 1907/2006 REACH

REACH Regulation 1907/2006 regarding Registration, Evaluation, Authorization and Restriction of Chemical Substances circulating in Europe, is applicable with effect on 1 June 2007.

REACH regulation requires that before being able to market a chemical article, the manufacturer or importer, have to register it on the European Chemicals Agency (ECHA) by performing a series of studies to determine the possible danger, the risks to health and the environment, exposure scenarios, etc.

Under REACH regulation, TITALIA SpA's products (zirconium and titanium bars, plates, sheets, coils, welding wires, forging products according to client's drawing) are considered as articles. These articles have no intended release, as outlined in the European Chemical Agency's Guidance on requirements for substances in articles and, therefore, there is no obligation of registration under REACH regulation for articles.

Therefore, based on information from our suppliers, TITALIA SpA has determined to the best of its knowledge that its products do not contain an amount greater than 0,1% w/w of the 223 SVHC list ("Candidate List" updated on 17th January 2022).

For more information do not hesitate to contact us at the email address titalia@pec.it.
